

Enjoy the Countryside SAFELY

Buzzers and Stingers worksheet 2

1. Which is which? Label these insects which can sting, then check with your teacher.

red ant - hornet - bee - hairy caterpillar - wasp

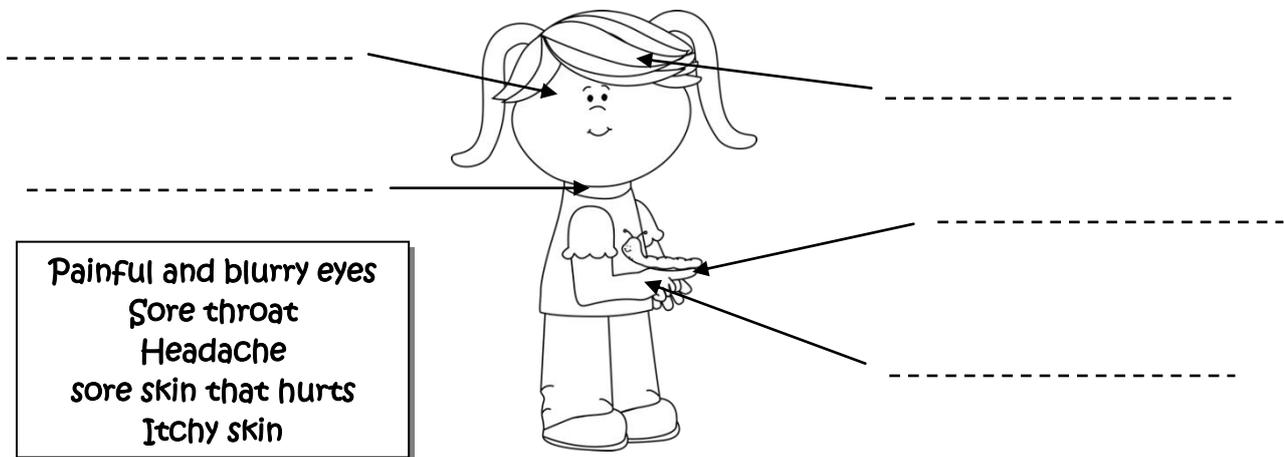

2. Fill in the gaps:

_____ ants can sting, but most ants are _____ and they don't sting.

3. Hairy caterpillars are much more dangerous than ants. Have you ever seen one?

4. This girl touched a hairy caterpillar. Label all the things it did to her:

4. Complete the advice with DO or DON'T. If you touch a hairy caterpillar.....

_____ shake it off because more hairs will come off.

_____ take it off carefully with a pen.

_____ wash with lots of running cold water.

_____ dry with a towel.

_____ use sticky tape to get the hairs off.

_____ use ice or calamine lotion to stop it hurting.

_____ use antihistamine cream.

_____ wash all your clothes as hot as possible to get the hairs off them.

5. Have you or anyone in your family been stung by a bee or a wasp? What happened?

6. Bee or wasp? Draw lines to connect each fact with the bee or the wasp. One fact is about both bees *and* wasps.

BEEES

FUZZY

Eat sugary human food lying around

Tuck their legs in when flying

Gentle, but sting if we scare them

Eat pollen and nectar

No hair

Have 5 eyes

Help plants live by eating other insects

Aggressive and ready to sting

Help plants grow by pollinating flowers

Dangle legs down when flying

WASPS

7. How to BEE safe from WASPS and HORNETS! Copy the advice into the correct box.

<p>If you get bitten</p>	<p>1. 2. 3. 4.</p>
<p>When it's an emergency</p>	<p>1. 2.</p>

- Rub antihistamine cream on the bite to stop the itching.
- Scrape bee stingers out immediately but don't squeeze them.
- Clean the sting area with disinfectant.
- Call 999 for an ambulance.
- Put ice on the sting to reduce the pain.
- Very rarely, someone could have trouble breathing or fall unconscious after a sting.

Remember to teach your family what you have learned today. To find out more, go to www.EnjoyTheCountryside.com
